DETAILED ACTION

Claims 16-18 are presented for examination.

Applicant's response to the restriction requirement filed on April 6, 2007 is acknowledged. Accordingly, Applicants elect Group II drawn to a method of treating mutant P53 mediated disease without traverse. Applicants elect a methylene group for R1 and for A an oxygen atom being doubled bonded without traverse. asserts that Group I and Group II should be rejoined and examined on their merits. Claims 16-18 read on the elected invention and are herein examined on the merits.

Applicant's submission of Information Disclosure Statement (IDS) filed August 23, 2004 and February 23, 2005 has been received and entered into present the present application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1614

Claims 16-18 are rejected under 35 U.S.C. 102(e) as anticipated by Myers et al. (US Pat. No. 6492386 B2).

Claims 16-18 are directed to a method of treating mutant p53 mediated disease such as cancer by administering an efficient amount of 2-methylene-3-quinuclidinone to the patient.

Myers et al. disclose the preparation of 2-methylenequinuclidin-3-one for treating a disease or condition in a mammal in need thereof (see col. 31, lines 7-15). Wherein the disease or condition is brain tumor. It is known that the compounds are particularly useful in the treatment of chemotherapy-induced emesis in cancer patients (see col. 3, lines 25-28). The compound 2-methylene-3-quinuclidinone is known in the art to be useful to treat cancer.

Thus, Myers et al. disclose all limitations of and anticipate claims 16-18. Consequently, the reference anticipates the claimed invention.

Conclusion

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zohreh Vakili whose telephone number is 571-272-3099. The examiner can normally be reached on 8:30-5:00 Mon.-Fri.
